Experimental Economics

1. Economic analysis of real behaviour using real people

Experimental Economics

1. Economic analysis of real behaviour using real people
2. Connected to and driven by economic theory

Experimental Economics

1. Economic analysis of real behaviour using real people
2. Connected to and driven by economic theory
3. Lab, Field, Natural experiments

Experimental Economics

1. Economic analysis of real behaviour using real people
2. Connected to and driven by economic theory
3. Lab, Field, Natural experiments
4. Skills (design, inference, programming)

What experiments are good for

- Testing Economic Theories

What experiments are good for

- Testing Economic Theories
- Exploring the World

What experiments are good for

- Testing Economic Theories
- Exploring the World
- Whispering the Ears of the Princes

What experiments are NOT good for

- Testing complicated 'realistic' conjectures

What experiments are NOT good for

- Testing complicated 'realistic' conjectures
- Eating out lecture times and entertaining students

What experiments are NOT good for

- Testing complicated 'realistic' conjectures
- Eating out lecture times and entertaining students
- Getting easy publications

School philosophy and outline

- Learning-by-doing

School philosophy and outline

- Learning-by-doing
- Bilingual environment

School philosophy and outline

- Learning-by-doing
- Bilingual environment
- Experiments, Lectures, Research Presentations, Groupwork
